

The **16<sup>th</sup> IADIS International Conference on Information Systems (IADIS IS 2023)**, was held in Lisbon, Portugal, from 11 to 13 March, 2023.

This conference was organized by the International Association for Development of the Information Society (IADIS).

The conference aimed to provide a meeting for the discussion of IS taking a socio-technological perspective. Its intention was to address the issues related to design, development and use of IS in organisations from a socio-technological perspective, as well as to discuss IS professional practice, research and teaching. The conference broad areas of interest were: IS in Practice, Technology Infrastructures and Organisational Processes; IS Design, Development and Management Issues and Methodologies; IS Professional Issues; IS Research and IS Learning and Teaching.

The IADIS Information Systems Conference 2023 received 149 submissions from more than 25 countries. Each submission was blindly reviewed by an average of 3 independent reviewers, to ensure the final high standard of the accepted submissions. Out of the papers submitted, 28 got blind referee ratings that published them as full papers, which meant that the acceptance rate was 19%. Some other submissions were published as short papers and poster.

Extended versions of the best papers were selected to be published in:

- ❖ The Journal of Electronic Commerce in Organizations (JECO) (ISSN: 1539-2937)

- ❖ the IADIS International Journal on Computer Science and Information Systems (IJCSIS). ISSN 1646-3692.

This edition, besides the papers' presentations, also included a keynote presentation by Professor Jyoti Choudrie, University of Hertfordshire, Hertfordshire Business School, UK.

**Keynote Presentation:**

**HEY SIRI, GOOGLE! CAN YOU HELP ME? A QUALITATIVE CASE STUDY OF SMARTPHONES AI FUNCTIONS IN SMES**

by Professor Jyoti Choudrie, University of Hertfordshire, Hertfordshire Business School, UK

Once again this event offered an opportunity to all their participants to discuss with success the most significant aspects regarding the context and research within Information Systems. It served as a forum that gathered researchers, practitioners, students and anyone that was working or studying in the field of the Information Systems.

The 16<sup>th</sup> IADIS Information Systems conference proceedings was published in hard copy (ISBN: 978-989-8704-48-1) by IADIS Press.
